Profit in Animals Trained for Incendiary Work.

MANY SCHEMES TO DEFRAUD

Man Who Makes a Specialty of Investigating and Prosecuting Commercial Crime Exposes Same of the Ways in Which Creditors Are Dafrauded-Organized Gang With Master Mind in Control Operates in Many of Larger Cities.

Declaring that the present period of industrial depression and the great wave of social crime which have been sweeping the country have also been accompanied by an increase of what is commonly called commercial crime, C. D. West, manager of the investigation and prosecution department National Association of Credit Men, exposed some of the schemes devised

"While the numerous forms of social crime are well known to the public, the workings of the commercial eriminals are not familiar to most persons," said Mr. West.

"The latter class deal principally with fraudulent bankruptcies, the mulcting of oreditors and often, even, the ruining of honest merchants, as well us the defeating of the workings of the law.

"The man who seeks to defraud the firms with which he is dealing on credit does his work carefully. secures small loans, paying the bitts usually in full, then gradually increases the amount of his orders

C. D. West.

until the sum reaches a high mark. Then is the anticipated time for the fraudulent bankruptcy or

"There are a great many ways in which these eriminals operate. In bankruptcy frauds the most common methods of beating the law are the concealment of assets, transfer of stock with the aid of a false burglary or fire and the dishonest claims of debts contracted and paid, usually to relatives.

Seek "Master Mind."

"Often it is necessary to contend with an organized gang, operating in several cities throughout the country and controlling arson and burglary gangs, shippers, receivers, lawyers and others.

"It is the 'man higher up', tha 'muster mind', that we are most concerned in getting. Many of their workers are merely dupes,

"While investigating a case in Paterson, N. J., not long ago I became interested in the disappearance of a dozen satchels used for transporting animals and I decided to trace them, I found that they had been shipped to Philadelphia and then to Chester, Penn. To Chester, I went, to the home of the man's father, whom I found to be apparently interested in cats.

"But upon further search I discovered the reason. The cats were being trained to fight lamps and when their training was completed they were sold for \$250 each.

Thus when a man wanted a fire in his store all that was necessary was for him to purchase one of these animals and leave it in his store with a lighted lamp, then go home and go to bed, assured that while he slept the cut would knock over the light and his shop would be destroyed by fire.

Clever Incendiary. "Some time ago I secured an indict-

ment of a man from the East Side of New York who had one of the finest schemes for setting tires that P have ever encountered.

"He would set a candle in the center of an ordinary lard bucket, pack the ton of the cover around the candle with cotton, and then around the outer edge of the top would place fittle sticks, stringing twine or thread around these posts and at regular intervals would suspend little sucks

filled with gasoline on the string, "The coudle would heat the oline and cause a strain, and then when the cotton was ignited the gasoline would explode with such force that the pieces would be blown to all parts of the room and no evidence could be found."
